**Re: Albion Sheridan Landfill Superfund Site
Notification of Approval of Final Design**

Dear Mr. Seymour:

The U.S. EPA and Michigan DEQ have reviewed the final design for the Albion-Sheridan Landfill and we hereby approve the design plans for the remedial action at the Albion-Sheridan Landfill. The U.S. EPA recommends that you clarify Section 6.2 of the Health and Safety Plan which addressed the required air monitoring action levels that would be used to either upgrade PPE or stop work such that this section of the Health and Safety Plan will be absolutely clear to your workers in the field.

Please be advised that the schedule shown on Figure 7-1 is now the approved Remedial Action Schedule and any slippages to this schedule should be approved by U.S. EPA in advance as these are the milestones that the U.S. EPA will endeavor to enforce.

Sincerely,

Jon Peterson
Remedial Project Manager
